# Full Stack Software Engineer - Job Posting

**Job Title** Full Stack Software Engineer

**Company Name** Reliant Mission

**Job Location** Remote

---

## About the Job

At Reliant Mission, we're on the lookout for a Full Stack Software Engineer who's passionate about building secure, scalable, and efficient software systems with modern technologies. This role is perfect for someone who enjoys tackling complex problems, from designing and implementing robust backend systems to crafting intuitive front-end interfaces. With us, you'll ensure high performance, reliability, and a seamless user experience, all while contributing to a mission that truly matters.

## Responsibilities

- **System Development:** Influence the design, development, and deployment of critical software applications and systems. Your work will support scalable, secure, and efficient solutions.
- **Collaboration:** Work alongside a team of dedicated engineers, sharing knowledge and employing clean code techniques to produce top-notch code that stands the test of time.
- **Problem-Solving:** Utilize analytical skills to troubleshoot and resolve complex technical issues.
- **Data Management:** Champion the security and integrity of application data with strategic data protection, storage, and access strategies.
- **Innovation:** Identify and implement system integration strategies, leveraging cloud and managed services to enhance product design and development.
- **Continuous Improvement:** Commit to refining and optimizing software performance, maintaining system efficiency, and embracing best practices for scalability.

## Preferred Requirements:

- A solid foundation in OOP principles.
- Demonstrable experience in software engineering, with a preference for those skilled in .NET.
- Exceptional problem-solving, analytical skills, and the ability to make informed design decisions.
- Proficiency in crafting well-structured, maintainable, and performant code, underscored by solid software craftsmanship techniques.
- Experience with version control, ideally git, and a commitment to test-driven development (TDD) and clean code principles.
- Strong communication skills and the ability to work effectively within a team.

## Why Join Reliant Mission?

- **Impactful Work:** Every line of code you write supports our mission to mobilize support-based missionaries for the Great Commission..
- **Collaborative Culture:** Join a supportive community that values your ideas, encourages growth, and celebrates success together.
- **Innovation and Learning:** Stay at the cutting edge of technology, with ample opportunities for professional development and innovation.
